

Pilot Testing Scheduled for December 2004

Pilot sites will participate in training on December 6-8, with access to the test system available through December. The testers will forward their comments to the Implementation Team for consideration of bug fixes and enhancements to be applied to CIMOR.

Pilot Sites include:

- Mid-Mo Mental Health Center
 - Fulton State Hospital
- Kansas City Regional Center
- Marshall Habilitation Center
- Pathways Behavioral Health
- Preferred Family Healthcare

Consumer Banking Implementation

The consumer banking function will be implemented in a Central area on the following schedule:

Training 11/29 to 12/3

Implementation:

Central MO Regional Center:
12/13/2004

Mid-Mo Mental Health Center:
12/20/2004

Kirkville Regional Center:
1/17/2005

Rolla Regional Center:
1/17/2005

Hannibal Regional Center:
1/24/2005

Marshall Habilitation Center:
1/25/2005

The CIMOR Look

This is a sample page from the CIMOR system, showing the menu bar on the left, with options available under My Organization. The main display area shows the View Organization page. Many of the CIMOR pages incorporate a tab design, which allows you to select an area and see another page of related data elements. Based on feedback from testers, the design of CIMOR is very user-friendly.

The screenshot shows a web browser window titled 'Contents Frameset - Microsoft Internet Explorer'. The address bar shows 'http://cimor.dmh.state.mo.us/CIMOR/UI/CimorHome.htm'. The page displays the CIMOR logo and a navigation menu on the left. The main content area is titled 'View Organization' and shows details for 'DMH Central Office'. The organization type is 'State Operated Facility'. The page includes tabs for Name, Addresses, Phones, Contacts, IDs, Groups, Sites, and Contracts. The 'Name' tab is selected, showing the organization name, type, date range, and enrollment status. A 'Comments' field contains the text 'The central office of the Missouri Department of Mental Health'.

CIMOR Functions Completed

The CIMOR functionality that has been completed to date encompasses the existing Vendor Information System, Contracts System, Service Catalog, Client Tracking System (CTRAC), MRDD/IS, and Medicaid Eligibility Information System (MEIS). Areas of functionality are listed below:
